

Software Engineer with 4 years of experience in designing, developing, and deploying robust software solutions. Skilled in multiple programming languages and agile methodologies, with a strong focus on optimizing performance and user experience. Proven ability to collaborate effectively within teams and deliver high-impact projects on schedule.

- Computer Engineering | Padmabhooshan Vasantraodada Patil Institute of Technology,Sangli (Budhgaon) .
- XII (Academy) Shraddha Institute Of Technology , Ichalkaranji.

- **Programming Languages:** Python · Java · C++ · JavaScript · TypeScript
- **Web Technologies:** HTML · CSS · React · Angular · Node.js
- **Databases:** MySQL · MongoDB

**MINDIT COMPANY,** MIRAJ, MAHARASHTRA / INDIA (April'3 – July'20)

Enthusiastic Software Engineer with 3 Month's of experience and a recent internship at MindIT, where I gained hands-on experience in developing and optimizing software solutions. Adept at applying technical skills and collaborating with teams to deliver high-quality projects. Passionate about leveraging innovative technologies to drive impactful results.

- Contributed to the development of a web application by implementing new features and debugging existing code.
- Developed and maintained web applications using .NET framework, enhancing functionality and user experience.

**DOMAIN COMPANY,**      SANGLI, MAHARASHTRA / INDIA      (Sep'10 – Nov'22)

Proactive Software Engineer with 3 Month's of experience, including an internship focused on domain-specific applications with expertise in networking and cloud services. Proven ability to develop, optimize, and deploy scalable solutions using modern technologies. Committed to leveraging domain knowledge and technical skills to drive innovative projects and enhance system performance

- Developed and optimized domain-specific applications using .NET technologies, incorporating networking and cloud services to address industry requirements.
- Configured and managed cloud infrastructure on AWS and Azure, facilitating efficient deployment and scaling of applications.
- Implemented and tested networking protocols to ensure secure and reliable communication between applications and services.

- **Online Voting System**

You may hear an online voting system being referred to as an online election system, an online e voting system, or electronic voting. These all make reference to the same thing: a secure voting tool that allows your group to collect input from your group and closely scrutinize the results in real time.

- **Food Order System**

A Food Ordering System is a food service technology solution that facilitates the seamless ordering process for customers and businesses. It leverages online platforms and integrated point-of-sale (POS) systems to streamline food ordering.
